## Experience

### Frontend Developer

Viget, Washington DC  
June 2017 – Present

Worked on multiple projects of different sizes on different tech stacks, ranging from one-off marketing sites to full-blown web applications. Knowledgeable in all parts of the production pipeline, including:

- Breaking up large projects into estimates to inform a plan.
- Setting up frontend tooling like Gulp.
- Collaborating with non-technical stakeholders.
- Creating production-ready assets.
- Managing deploys and providing devops support.

**Day-to-Day:** Javascript, CSS3, HTML5, Craft CMS.

**Passions:** Browser performance and utilitarian UI animation.

### Projects:

- **Project on Government Oversight:** A custom Craft CMS site that I led from conception to launch. Features a system of reusable page builder blocks and Algolia integration for robust searching.
- **Optify:** A coaching platform built with Elixir on the Phoenix framework. Leverages websockets for real-time chat messaging.
- **Bethesda Softworks:** A design refresh spanning multiple sites. I learned Vue.js on a tight timeline to align with their existing code.
- **Craig Hospital:** An overhaul of their resource library. I delved into data architecture to implement keywords for better search results.
- **White House Historical Association:** A one-off marketing page.

## Education

### Fullstack Academy

Dec 2016 – April 2017

Immersive fullstack bootcamp for women with 8% acceptance rate. Learned the Javascript NERD stack.

### Cornell University

2008 – 2012

B.A. in Linguistics

## Activities

### React NoVA Meetup

Co-Organizer  
2018 – Present

### Young Nonprofit

#### Professionals Network

Technology Committee  
2013 – 2015

Elected to manage technology needs of volunteer nonprofit.

### The New Nonprofit

thenewnonprofit.co  
2014 – 2016

Wrote articles about nonprofit tech, published in Asian Philanthropy Forum and AsianNGO magazine.

## Skills

### Advanced

Javascript ES6,  
HTML5, CSS3, SCSS,  
Craft CMS, Twig,  
Accessibility

### Proficient

React, Redux, Gatsby,  
Vue, Elixir, Ruby,  
Node, REST APIs,  
Express

### Some Familiarity

React Native, PHP,  
Jasmine, Mocha, Chai,  
PostgreSQL

### Toolbox

Gulp, Git, Circle CI,  
MAMP, Sequel Pro,  
Figma
